ABOUT

I'm Rajarajan, a highly motivated and creative Junior Frontend Developer with a passion for crafting immersive digital experiences. My journey into the world of web development began with a fascination for turning ideas into dynamic and user-friendly interfaces. Outside of coding, you might find me exploring the latest frontend frameworks, experimenting with UI/UX concepts and designs.

PROJECTS

- **PROMTOPIA** - This website is built to connect individuals who possess the skill to engage with AI models, and enabling them to share and discover AI prompts in areas such as programing, food, music and etc. Users can explore these prompts to spark ideas, enhance their understanding of AI interactions, and encourage creativity.
  Technologies used - Nextjs, MongoDB, TailwindCSS, Git

- **PROJECT MANGEMENT** - This web application enables users to collaborate effectively on projects by managing tasks and sharing responsibilities. It integrates Firebase authentication for user accounts and Firebase Realtime Database for real-time data storage and retrieval.
  Technologies used - React, Firebase, CSS, Git

- **ChesterEstate:** This website is built to connect people who are looking for a beautiful place to start their new journey. Users can use CRUD functionalities also they can contact the owner of the House for futher details.
  Technologies used: React, Redux, MongoDB, Express, Git, Firebase, TailwindCSS , Nodejs
